

BASELIGHT™

600MX

- ▶ Superior light & true portability
- ▶ Low energy consumption
- ▶ Easy to ship & deploy without heavy machinery
- ▶ Built to withstand any climate (Dirt & waterproof)
- ▶ Manual or automatic digital mast system
- ▶ Maintenance free

WiFi

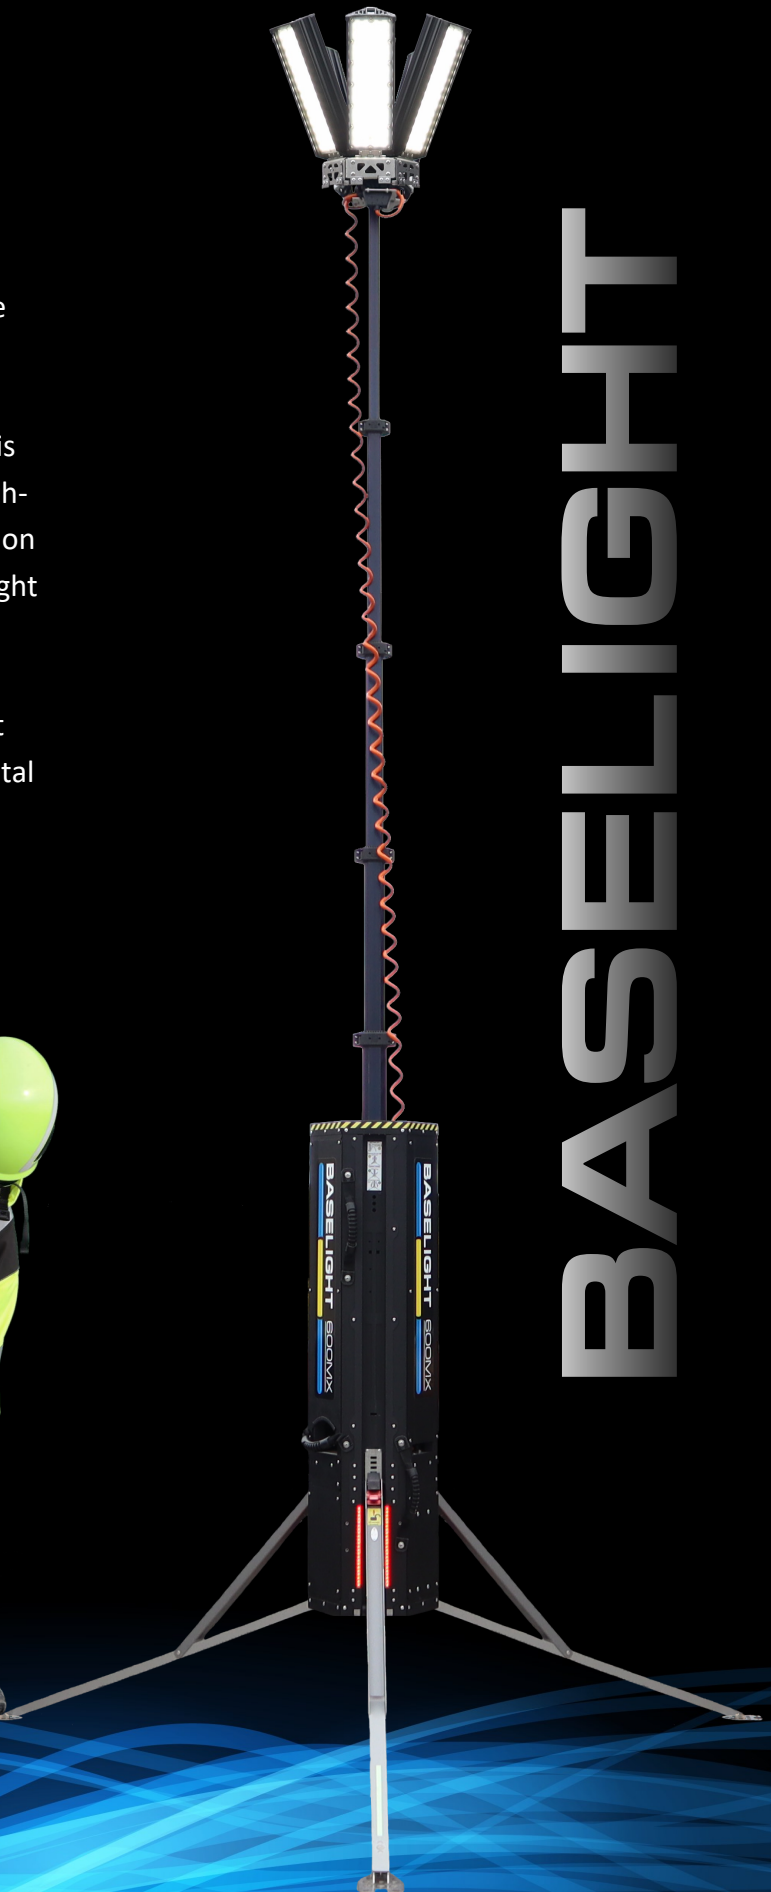

PRIME
DESIGN SWEDEN AB

OVERVIEW

The Baselight series of LED light towers has been designed as a replacement for the old style heavy light towers to offer superior performance in a truly portable format.

This means that large area illumination is now possible to be deployed quickly without the need of heavy machinery. Once on site a single person can reposition the light where it's needed, when it's needed.

Not only do these features save direct cost of transport and lower environmental impact it also means a quicker and safer way to work.

BASELIGHT

600MX FEATURES

SMART FEATURES

- Wi-Fi smart phone remote
- Selectable light patterns
- Anti theft lock
- Automatic wind to height
- On/Off timers
- Over the air updates
- Programmable light output
- Power out mast retraction
- Optional 4G camera

Easy to understand manoeuvre panel. Industry standard CEE power sockets (16A or 32A) with chain port.

360 Degree or fold out floodlight

Digital high precision mast system

High strength aircraft grade aluminium chassis

Individually adjustable legs for uneven terrain support

Blinking LED warning lights to prevent trip hazard

Multiple ergonomic grip handles

Integrated wheels for easy transport

MADE IN SWEDEN

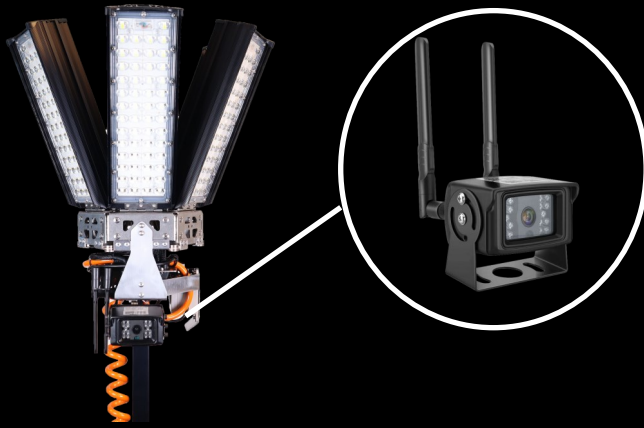

TECHNICAL SPECIFICATION

Power consumption: 20-670W @230VAC
Lumen: 0-95000 (Dimmable)
Voltage: 110V-230VAC 50/60 Hz
Temperature range: -30C to +60C
Wind resistance: >30m/s (Automatic wind to height adjustment)
Height: 1.2m - 4.4m
Width: 28 x 32 cm (Chassi)
weight: 46 Kg
IP rating: 65

Wi-Fi control (standard)
Bluetooth control (optional)
App support: Android
Electro-Digital mast system
On board management computer

Stainless SS304 Steel details
High strength aluminum (Chassi & telescopic mast)
Fiber enhanced plastic
Opti Beam PPMA LED lenses
High power Bridgelux LED diodes
High performance Aluminum LED heatsinks
CEE 16A, power inlet
CEE 16A, Power outlet
Self-locking support legs
Pressure distribution leg plates
Glow in the dark tape on legs
Trip warning LEDs on legs
Anti-theft mast locking
On-Off programable timer
Predefined light patterns (steady, blink police/emergence etc.)
Software upgrades over the air
Modular construction for easy repair
Big plastic wheels for uneven terrain
Multiple carrying handles
Deep multilayer anodization for surface protection
3 year warranty on mechanical and 10 years on LED
360 degree, floodlight wide beam LED armature of stainless steel
Built in operations pictograms

OPTIONAL ASSECOORIES

4G camera

Integrated 4G camera with live view support and motion detection. Supports remote speak and listen. Support multiple alarm notifications,

Terrain wheels

Snapp-on terrain wheels for easy movement in heavy terrain.

Warning lenses

Coloured lenses that together with predefined flashing light pattern signal accident or attention.

Portable battery

2kWh portable Lithium battery with integrated DC to AC output. 800W true sinus . Waterproof (IP66)
